DESCRIPTION

The CYAC of Nipissing will be fully operational in January 2019. The overall aims of the centre are to provide a better response to child/youth victims of crime; prepare better prosecution deliverables; and reduce the cycle of abuse through education, awareness and prevention.

To address the unique challenges children/youth face in navigating the Criminal Justice System, our multidisciplinary team, including law enforcement, child protection, prosecution, mental and medical health and victim advocacy professionals, will work together to reduce the potential for secondary systemic trauma by decreasing the number of interviews children endure, providing a physically and psychologically safe, child-focused, child-friendly facility and increasing seamless access to services.
