The Central Alberta Child Advocacy Centre is a not for profit organization rooted in the protection and recovery of today's most innocent and vulnerable – our children. The Centre is comprised of a collective that is driven by the courage to support children, youth, and their families affected by abuse, enabling them to build enduring strength and overcome adversity.

We work in a collaborative partnership with the Central Region Children's Services, Alberta Health Services Addiction and Mental Health, Alberta Justice, Alberta Education, the Central Alberta Sexual Assault Support Centre, Red Deer College and the RCMP. Together we harness our collective courage to provide children with supported recovery. It takes courage and bravery for a child to share their story of abuse, for families to bring their children forward, to believe, to listen without judgement, and to seek justice.

Along with opening our doors in November 2017 to support the children and youth of Central Alberta, we have embarked on a capital campaign for a new building – a Centre of Excellence. As an organization we are ecstatic to take another step forward in becoming a Centre of Excellence,

specializing in leading practices, training, research, community awareness, advancement in education and integrated practice. The new location of the Central Alberta Child Advocacy Centre, built on Red Deer College main campus, will enable a tremendous shift in our community's future as we continue to push boundaries and champion leading practices.

Supporting the Central Alberta Child Advocacy Centre today is an investment in the promise and possibility of a healthy future for our children and our community.
