DESCRIPTION:

The Child Advocacy Centre in Orillia opened in 2014, and our Barrie Centre in September of this year. Since its inception, our Barrie Centre has enabled improved access to families in the South Simcoe region; reducing travelling time for children and families, and strengthening connections with local police and family services. The Orillia Centre houses a medical room, and both Centres are equipped with investigative interview equipment, and on-site Child and Family Advocates. Our mission is to promote healing, reduce trauma, and impart hope to children and adolescent victims of abuse, and their families. We also offer awareness and education programs to ultimately prevent the risk of child abuse and exploitation.

Collaboration is key to all that we do. We deliver a multidisciplinary approach to care for children, youth and families through partnerships with Police, Child Protection Professionals, Social Workers and Health Care Professionals. Furthermore, we have onsite Advocates that provide children, youth and families with ongoing support services.

MULTI-DISCIPLINARY TEAM (MDT) includes:

- Police
- Child Protection Professionals
- Social Workers
- Health Care Professionals
